

Diana Quesada Bermúdez

Web developer / Informatics and Multimedia Technology Student

Projects

ASP.NET Core Web Application Project 2024

ASP.NET Core | MVC | API | C# | SQL Server | Visual Studio | Git | Figma

- Development of a project in ASP.NET Core utilizing the pattern MVC and integrating SQL Server as the database tool.
- Management of business logic, data access, and views.
- Implementation of the C# language and the Visual Studio Community platform.

Scrum Web Project - Portal ITM 2023

HTML | CSS | Vue.js | Firebase | Scrum | Visual Studio Code | Git

- This project uses technologies like Vue.js and implements Firebase to deliver a functional application developed in Visual Studio Code platform.
- Participation as a Scrum Master to organize the team and deliver the project on time making use of Asana.

Mobile App Development - BoxB (Android) 2023

Java | Android Studio | OOP | Firebase | Git

- Development of an Android mobile application using Java and Android Studio. Implementation of the Object-Oriented Programming principles and best practices.
- Integration of Firebase as the real-time database solution.
- Work on both front-end user interface design and back-end logic implementation.

Experience

Student in Informatics and Multimedia Technology

- Web development utilizing HTML, CSS, JavaScript frameworks.
- Mobile app development for Android.
- Knowledgeable in software development using MVC and OOP principles.
- Adept at graphic design and UI/UX using tools like Figma.

AIIESEC Volunteer | February 2021 - July 2021

- Created engaging digital content for social media platforms.
- Collaborated with cross-functional teams to develop content.
- Demonstrated teamwork, communication, and organizational skills.

Academic Information

Universidad de Costa Rica (UCR) | 2021

Informatics and Multimedia Technology | Currently enrolled

Organización de los Estados Americanos (OEA) | 2023

Creando una Trayectoria Profesional en Ciberseguridad

AWS Academy | 2022

AWS Academy Cloud Foundations

About me

Final-year student in Informatics and Multimedia Technology. I have skills in software development, understanding programming logic in languages such as C# and Java, and database management. Thanks to this, I have worked on creating interactive and user-friendly websites using both front-end and back-end technologies. My knowledge also encompasses agile methodologies and their implementation in project management using Git control.

Soft Skills

- Creativity
- Active Listening
- Responsibility
- Problem Solving
- Adaptability
- Team Collaboration

Languages

Spanish

Native

English

Intermediate C1
